

AK 012 STREAKING GRIME

This enamel product creates realistic streaking effects on your models. Easy to apply. Very realistic color.

To create the effect of dirt apply the product directly from the jar with a fine brush. In this case it has been applied from above to create streaks and accumulated at the bottom to create the effect of accumulated dirt.

It is convenient to use a clean brush, in good condition, damped in thinner AK011 White Spirit to work. It is convenient to dry it a little on some paper before each pass.

Once the product dries with the not too wet brush soften the surface sweeping vertically from top to bottom and will join in the bottom to get both effects.

The final result.

Here you can see the effect applied, one side (left) brushed with the thinner and the other side ready to be brushed.
