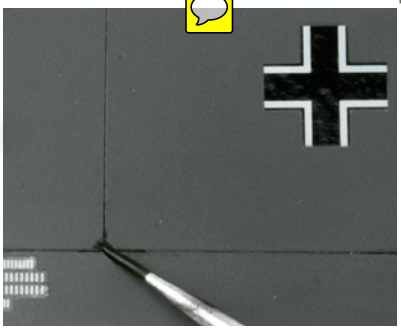
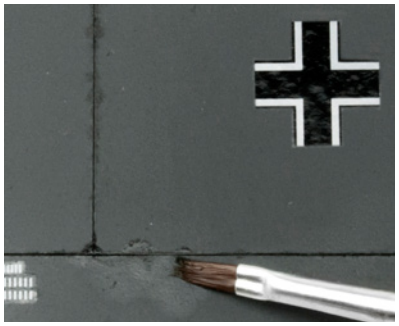
AK 2072
GREY AND BLUE CAMOUFLAGE

Many modellers struggle as they have to choose a color to accentuate the panel lines of an aircraft. We did the thinking for you and offer you the right color for each scheme, ready to use.

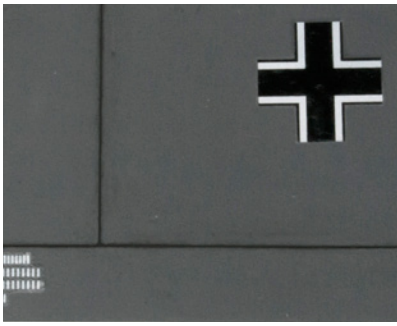
Accentuating panel lines really brings an aircraft model to life.



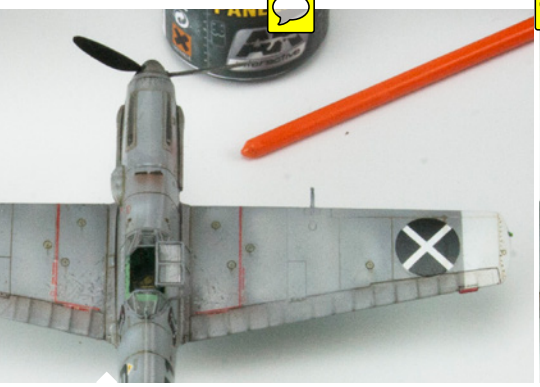
Paint on the product straight from the bottle.



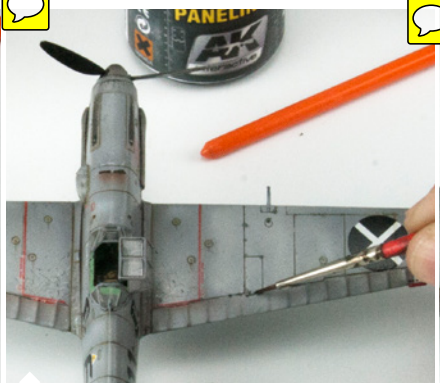
After 5 till 10 minutes clean the excess paint off with a brush moistened with White Spirit.



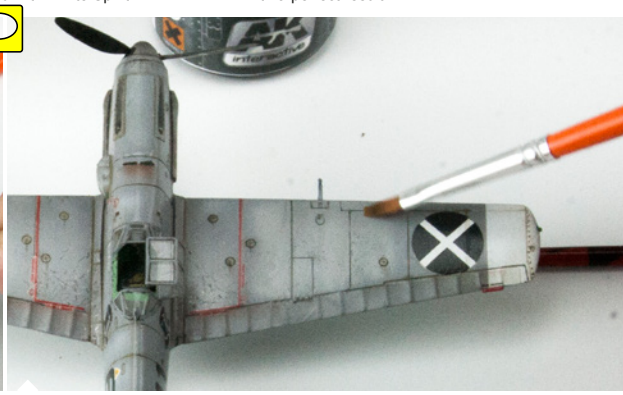
This method is fast and easy to use with a perfect result.



Without a the Paneliner a model looks good but there's room for improvement.



Shake before use and paint in the panel lines.



Remove the excess with a clean brush and White Spirit. Do you notice the difference?
