

AK 093 WASH FOR INTERIOR

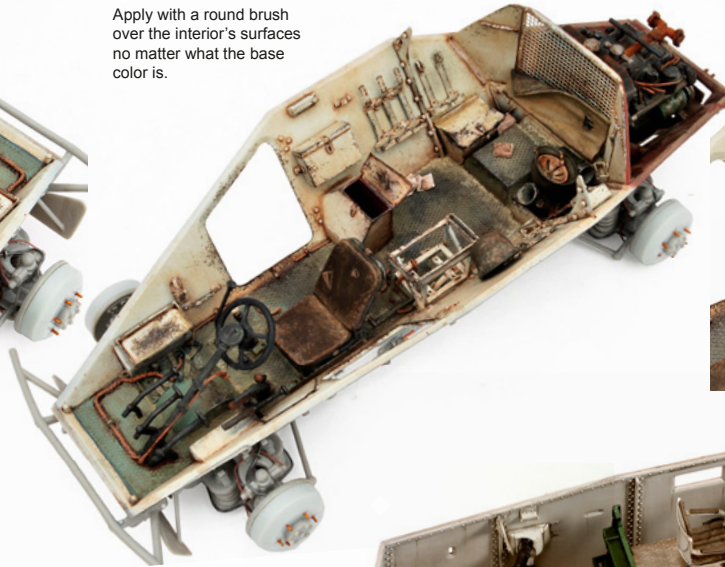

This product allows us to bring life to the details of the interiors of our models. This wash is especially designed to be applied over the light interior colors such as RAL 9001 Creme Weiss or white. It speaks for itself that it can also be used on models painted in winter camouflage.

Once your model has been painted with the base color you can proceed with the interior wash.

Apply with a round brush over the interior's surfaces no matter what the base color is.

Once dry remove the excess with a brush dampened in White Spirit.

This product along with dust and dirt effects achieves ultra realistic finishes.

It can also be applied over for example NATO white vehicles.

Be confident to apply the wash over the interior surfaces of your model as later on you can easily remove the excess paint.
