

AK 576 SAW SHAPE WEATHERING BRUSH

Specifically designed to make plain strokes and streaks with oils and enamels.

The Surface where we are going to apply the streaking effect has to be the most homogeneous possible.

To apply the base streaks use a rounded brush.

With the Saw Shape brush moistened in White Spirit and vertical subtle movements spread the effect until we achieve the desired look.

With subsequent coats shade the effect and make it more subtle each time to achieve a realistic result.
